

3rd ANNUAL MEETING - THE SUCCESS STORY CONTINUES

Prof. em. Dr. C. Marinello

Dear friends and colleagues,

IADDM held its 3rd annual meeting in Berlin, Germany. An outstanding scientific program attracted colleagues from all over the world. The family-style encounter with great networking opportunities secured gross profit to everybody. The strength of the scientific program originated from the diversity of the themes. Beside a fulminant start with an innovative industrial input, digital innovations in the fields of prosthodontics, orthodontics, operative dentistry, implant surgery and technology were presented on the highest level.

We thank our speakers for the outstanding performance. A highlight of the meeting was the awarding of an IADDM Honorary Membership to Prof. Dr. François Duret, DDS, DSO, PhD, MS, MD-PhD, known as a Pioneer, a Visionary and especially as “The Father of Dental CAD/CAM technology”. His distinctive contributions to Digital Dental Medicine as an innovator and as a teacher were highly lauded. IADDM as a young organization is very proud to have two Honorary Members included in its membership. We thank the program chairs, Wael Att and Esam Tashkandi for their extensive work leading to a perfect organization and a unique scientific program. Special thanks go to Quintessence company in general and the Dr. Haase family in particular for their administrative help. Last but not least, we highly appreciate the unrestricted support and commitment of our sponsor companies, such as the Platinum Sponsors DIO Implant, Dentsply Sirona and Planmeca, the Gold Sponsors Thommen Medical and Dental Direkt, the Silver Sponsor Ivoclar Vivadent, and the Bronze Sponsor GC Dental.

After the meeting is just before the meeting. The Scientific committee works diligently to prepare for 2018’s meeting in fall in Nanning, China. We anticipate having an excellent 2-days-event to spend time together for scientific sessions and to delight in each other’s company. Please visit regularly our website for up-to-date information.

Last but not least, please help to support our aims such as 1) to attract and increase the number of Active and Associate Members to a respectful size, 2) to involve national as well as sponsoring organizations to be part of IADDM and 3) to position IADDM as a brand and as a not-to-be-missed-international-digital-event in the dental community.

I kindly welcome you to participate in our Academy and I am looking very much forward to welcoming you to the 4th International Annual Meeting of the IADDM in 2018.

Yours sincerely,

Prof.em.Dr.Carlo,Marinello
President IADDM

REPORT 3rd ANNUAL MEETING IADDM

Prof. Dr. Wael Att

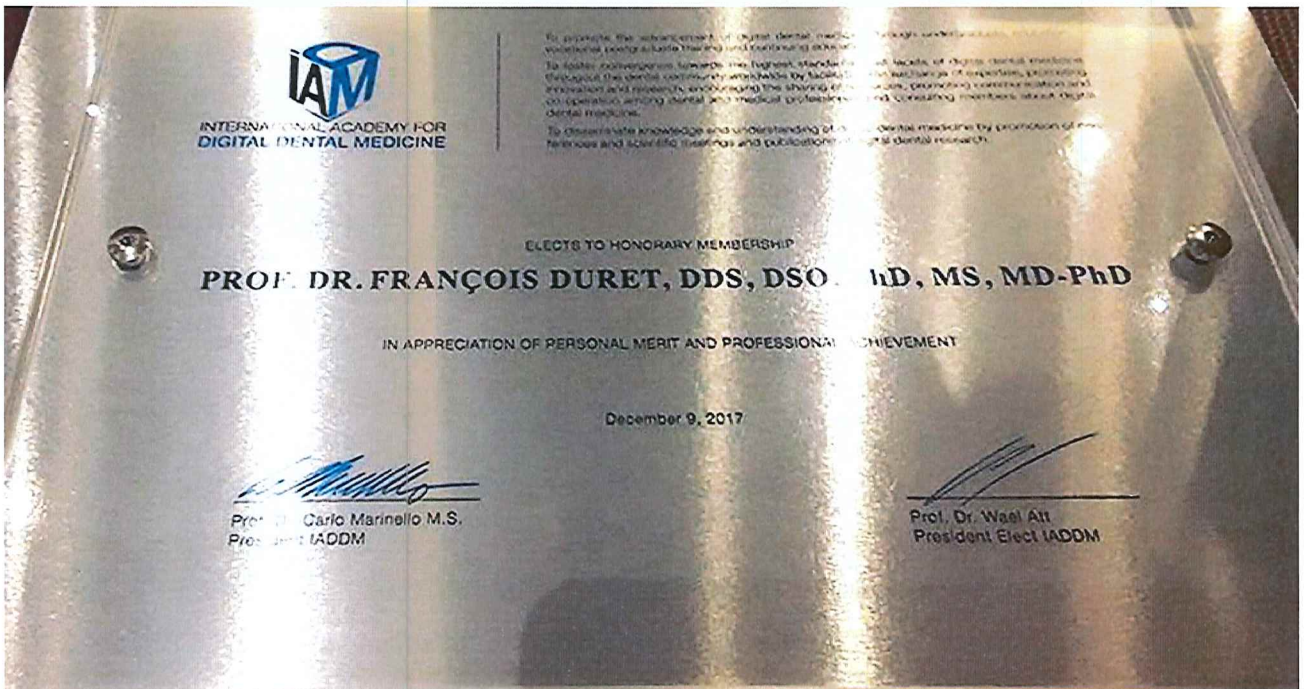

Prof. Dr. Esam Tashkandi

Dear friends and colleagues,

The third edition of our annual meeting took place in Berlin. Focus was given to include young talented researchers and clinicians in the field of digital dental medicine. We had a perfect lineup of speakers that covered different areas of digital dental medicine, such as implantology, orthodontics surgery, conservative dentistry, prosthodontics, periodontology, dental technology as well as financial considerations for contemporary practice and laboratory. Such a combination of speakers provided the participants with a perfect and a broad-spectrum exposure to the latest developments and their implementation.

In addition to the scientific program on Saturday, a pre-congress day preceded with an interesting workshop about innovations in digital dental medicine. During the workshop, Dentsply Sirona presented the latest digital workflow in implant dentistry to the participants. The workshop was accessible to the meeting participants without additional registration fees. Further, a poster presentation session on topics related to digital dental medicine was organized. All IADDM members and non-members, especially those who are interested in sharing and exposing their innovations and findings at an international level were invited to submit their abstracts. The poster winners received a recognition as well as an award. The academy congratulates Dr. Kazumichi Wakabayashi (Japan), Dr. Hyung-In Yoon (South Korea) and Dr. Amira Alammar (Germany) for receiving the poster awards. Another new addition to the meeting was the Best Educational Video in Digital Dental Medicine. The award is generously supported by a grant provided from Zimmer Biomet. All IADDM members were invited to submit their videos about topics related to digital dental medicine. Although no winner video was selected this time, the jury decided to grant Dr. Onur Ozturk (Turkey), Dr. Osman Er (Turkey) and Dr. Alexander Vuck (Germany) an award of 250 Euros each in appreciation of their efforts to submit high-quality videos and to post their work on the IADDM website. As a highlight of the meeting, and in recognition of his significant contribution to advancing digital dental medicine, IADDM awarded Prof. Dr. François Duret the honorary membership.

In addition to the distinct scientific, the central location of Berlin as well as the enchanting timing of the congress guaranteed a wonderful and a joyful experience for the participants. As Christmas was in the same month, the city of Berlin was exceptionally vivid and cheerful with traditional Christmas markets at every corner. Clearly, the meeting was a wonderful event to all participants.

We thank all friends and colleagues, who attended the meeting and shared the beautiful time with us. Also, the support of Quintessence Publishing, sponsors and exhibitors had a tremendous impact on the success of the meeting in Berlin.

Yours truly,

Prof.Dr.Wael.Att.Prof.Dr.Esam,Tashkandi
Program Chairs

Invited Speakers

We have invited renowned speakers that will cover the topics “Digital Implantology”, “Digital Prosthodontics”, “Chairside CAD/CAM”, “Digital Imaging”, “Digital Orthodontics”, “Digital Reconstructive Dentistry”, “Digital innovations in esthetic dentistry” and “Digital Technology”.

Speakers (in alphabetical order): Domenico Baldi, Byung-Ho Choi, François Duret, Galip Gürel, Tim Joda, Jongyub Kim, Henri Lenn, Walter Lueckerath, Masayuki Okawa, Marco Rinaldi, Clemens Schwerin, Roberto Spreafico, Benedikt Wilmes.
